Sophomore student

Experiences

Recruitment website:

- **Link Github:**
 - + Front-end: <https://github.com/Bobolan123/next-recruitment-web>
 - + Back-end: <https://github.com/Bobolan123/nestjs-recruitment-web>
- **Members:** 01 (Self-learning personal project), manage code on Github.
- **Technologies:**
 - + Frontend: Nextjs, Mui, Antd.
 - + Backend: Nestjs
 - + Database: PostgreSQL
- **Main features:**
 - + CRUD users, companies, jobs ...
 - + Apply CV.
 - + Pagination: companies and jobs.
 - + Admin dashboard to manage.
 - + Authentication: JSON Web Token.
 - + Authorization: Endpoint that User allow to do is assigned to Role.

Python: I have a solid grasp of the syntax, yet my experience in building Python backends is limited. Nevertheless, I'm eager to swiftly delve into learning Django or any backend framework related with it.
